

**Integrating Neural Systems:
Improving Performance in Children with Learning Disabilities**

About the Author

W. Michael Magrun, M.S., OTR/L is an NDT certified therapist in pediatric treatment and baby treatment. He is a former instructor in pediatric therapy at SUNY at Buffalo and the University of Central Arkansas. His clinical experience ranges from institutional and clinic settings to school settings and private practice. He has published articles in a number of journals and published several manuals and videos on various aspects of pediatric assessment and treatment.

**Integrating Neural Systems:
Improving Performance in Children with Learning Disabilities
Topic Index**

Section 1: Pages 1-17

Introduction

Neural Systems Organization

Postural Control

The Visual-Vestibular-Cervical Triad

Parallel-Distributed Processing

Comparator Systems & Internal Maps

Neural Systems Interaction

Video Part 1: (16 min.) The Visual-Vestibular-Cervical Triad

Section 2: Pages 18-29

The Importance of the Neck

Video Part 2: (17 min.) Neck Structure and Neck Movements

Video Part 3: (10 min.) Importance of the Neck on Supine Flexion

Section 3: Pages 30-43

The Importance of the Somatosensory System

Video Part 4: (11 min.) Disorganized Posture and Movement Examples

Video Part 5: (9 min.) The importance of Alignment in Organized Motor Control

Section 4: Pages 44-62

The Importance of Visual System

Video Part 6: (7 min.) Influence of Ambient Processing on Play Behavior

Video Part 7: (22 min.) The Influence of Vision on Posture and Movement

Video Part 8: (4 min.) Influence of Prism Lenses on Midline Organization

Video Part 9: (9 min.) Effects of Prism Lenses on Movement Organization

Video Part 10: (18 min.) Importance of Combining Physical Treatment with the Use of Prisms

Section 5: Pages 63-67

The Importance of the Vestibular System

Section 6: Pages 68-77

Sensory Integration Theory and the Concept of the V-V-C Triad

Physical Handling to Change Neuropostural Organization

Concepts of Re-weighting in Neural Systems Integration

Video Part 11: (21 min.) Physical Handling Example

Section 7: Pages 78-97

The Concept of Multiple Midlines

Rib Cage Mobility and the Organization of Rotational Patterns

Visualization and Body Image

General Considerations

Considerations Related to Primitive Postural Reactions

Video Part 12: (24 min.) The Concept of Multiple Midlines

Video Part 12: (12 min.) Influencing Rib Cage Mobility

Section 8: Pages 98-111

The Integrating Effects of Physical Handling

Re-weighting and Dual Influences of Neural Systems

Summary
