

# CONCEPTS & GUIDELINES IN BABY TREATMENT

## About the Speaker

Mary Quinton was a British physio-therapist who trained early with Mrs. Berta Bobath, and went on to develop effective early treatment of infants in Switzerland, with the support of pediatrician Dr. Elsbeth Kong. Ms. Quinton continued to teach and treat babies until her passing. Her work has been the foundation for the establishment of baby treatment programs in most major countries of the world. Her legacy is all the babies she helped live better lives through her treatment and all the therapists she trained who continue to carry out her remarkable work.

## Topic Index

### Part 1

About the Author

### Part 2

Important Information from the Author

### Part 3

How to Receive a Certificate of Continuing Education

### Part 4

Tools for Changing Tone and Movement Patterns
