

Homecare for the Critically and Terminally Ill

Produced by J McD Enterprises, LLC

Presented by Judy A. McDonald

“Homecare for the Critically and Terminally Ill” is a program designed for ordinary people who find themselves in the role of primary caregiver without having the benefit of any professional, medical, or nursing training. It discusses practical issues and solutions to daily care responsibilities and problems that arise during home care. It is useful to the professional as a guide in developing and communicating practical training and assistance to families they may be involved with in homecare settings, especially in guiding families and caregivers through the sequence of care as the ill person becomes weaker and less responsive.

Topic Index

Part 1

Introduction.....	10 min.
Getting Ready	4 min.
Mobility.....	21 min.
Food Preparation.....	12 min.

Total Time: 47 min.
